We all know storage space is at a premium whilst you're travelling, so taking the essentials (like tables and chairs) can sometimes be a pain. Why not install a picnic table on the outer wall of your RV? It's one less thing you have to pack and you can never leave it behind! Quick and easy to install, the Coast Picnic Tables feature powder coated, stainless steel hinges and are rated to a huge 30kg\*. The table itself is made from SMC (sheet moulding compound) which is the same material used by Audi and Porsche! Available in white, the Coast Picnic Tables are suitable for installation on fibreglass and aluminium cladded RVs (note that in the case of aluminium cladded vans, the Picnic Table with Backing Plate must be installed). Comes with 2 keys so that you can lock your table in a "closed" position when not in use.

*\*Whilst the Coast Picnic Tables are rated to hold 30kg, you should ensure that the structure you're fitting it onto (i.e. aluminum cladding or fibreglass paneling) can hold that weight. Coast recommends that you: 1) Check with your RV's manufacturer, prior to installation, how much weight the walls will hold. 2) Ensure you do not exceed the weight that your RV manufacturer has recommended.*

Backed by a huge 3yr warranty, the ADCO Designer Series is available to suit Camper Trailers, Caravans, Pop Tops and Motorhomes. They're designed for high sun exposure, high moisture, long term storage and even snow, making it the most durable cover on the market! It features superior UV stabilised and breathable fabric that blocks out 99.8% of the suns damaging UV rays. On the Caravan, Pop Top and Motorhome models, there are zippered panels along one side. These allow you access to the interior of your RV whilst the cover is on, and because of the eyelets on these panels, they can also double as an awning!

## Features

- > Side panels are made of four layers of polypropylene with a soft lining that won't scratch your RV paintwork

## PREMIER ONE CLEANING PRODUCTS

If you've ever found giving your RV a good clean bit of a mission, Premier One have come up with a great, practical idea! Telescopic, industrial strength poles that have a screw-end to attach a brush head. The brush head has super soft, non-abrasive fibres on it... so you don't have to worry about scratching the paint work on your RV.

There are two types of telescopic options available:

- > A non-flow through pole, with a comfortable safety grip
- > A flow through pole, with a comfortable safety grip.

This one is particularly useful because you can attach hose to it, allowing water to flow through the pole and onto the brush head. There is also an "on/off" switch at the end of the pole so that you're able to minimise water wastage.

These poles and brushes are great for use on your RV or around the home, cleaning those hard to reach windows is now a breeze. Also great for the marine, transport and manufacturing industries.
